TRANSITION SUCCESSSES

HunaTek understands the complexities of transitioning mission critical contracts. Our strategy and focus during all program transitions centers on the following:

- A risk-centric system focusing on stabilizing a program during its initial transition while minimizing operational impact and business processes captured.
- Incumbent capture of 80% or more while bringing in new talent for the remaining 20%.
- Minimizes risk of losing domain knowledge at the critical start of contract, while allowing for the opportunity of new ideas and innovation from new talent.

Our results below highlight the successes we've enjoyed with our government partner community:

Program	Transition Days	Incumbent Capture %	FTE's
Air Force Special Operations Command (AFSOC) Processing, Exploitation and Dissemination (PED)	0	100%	14
United States Marine Corps End to End (E2E) Support	1 Day	100%	18
U.S. Army Office of the Judge Advocate General IT Support (OTJAG)	1 Day	100%	33
Department of State Network Operations Branch IT Services (NOMBIT)	14 Days	82%	17
